**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1, 4, 7, 9, 12 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Crawford (USP. 6,456,242).

Regarding claims 1, 4, 7, 9 and 12, Crawford disclose a conformal box antenna comprising :

- a wireless network computer having a chassis (510) (Fig. 9);
- an integrated chassis antenna that is coupled to the integrated chassis antenna (Col. 5, Line 33-42);
- a first wireless network device (572) coupled to the integrated chassis antenna (530) (Col. 10, Line 52) Fig. 10); and
- a second wireless network device (570) operative to communicate with the wireless network computer (Col. 10, line 1-3);
- an antenna having a feed point (Col. 8, Line 1); and the wireless device (470) coupled to the feed point of the antenna (450) (Col. 8, Line 1) (Col. 8, Line 36-52) (Fig. 7);
- the antenna includes a center conductor retention feature (Fig. 10);

Art Unit: 2821

- Regarding claim 14, Crawford also disclose a method of fabricating a chassis (Col. 13, line 24); and
- Integrating an antenna with the chassis (Col. 2, line 4-15) (Col. 13, line 24-36).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 6 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crawford.

Regarding claims 2, 6 and 11, Crawford disclose a conformal box antenna comprising a chassis (502) includes a front edge (Col. 9, Line 29) (Fig. 8). However, Crawford is silent on the limitation of the coaxial cable shield conductor is coupled to the chassis at the front edge. Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the coaxial cable shield conductor is coupled to the chassis at the front edge as to be a ground circuit since it was known in the art that (Col. 6, line 58).

***Allowable Subject Matter***

5. Claims 3, 5, 8, 10, 13 and 15-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Citation of relevant prior art***
